EDUCATION

Course	Passing Year	College/School	Grade
BTech (ECE)	2020-2024	Netaji Subhas University of Technology	7.50 CGPA
Class XII (CBSE)	2019	Govt. Boys Sr. Sec. School, New Delhi	81%
Class X (CBSE)	2017	Govt. Boys Sr. Sec. School, New Delhi	8.0 CGPA

EXPERIENCE

- <u>Web Developer Intern</u> (**Sync intern`s Pvt Ltd.**)   (01/07/23-01/08/23)   {internship Details}
    - I work as a web developer at Sync Interns. In this role, I collaborate with a team/individual on various tasks and solve problems related to web development within limited timeframes. We utilize different web development tools such as HTML, CSS, Tailwind CSS, JavaScript, etc.
- I also volunteer for the non-profit organization "<u>Desh ke Mentor</u>" where I mentor government school students to help them decide their career paths.

PROJECTS

- ### Shopping Cart
    - It is a fully responsive multi-page website with React.js, Tailwind CSS, Redux, and React Icons for seamless experience.
    - Effortlessly retained user-selected items across pages, storing the cart for easy access between sections.
    - Empower users to effortlessly customize their selections with intuitive options to add or delete items from both the homepage and cart.
    - Automated Cart bill generation, ensuring user-friendly transparency.

- ### Quiz game
    - We employ a variety of frontend techniques, including HTML, CSS, JavaScript, icons, and other innovative methods.
    - Within this framework, we present a question that offers three options, with only one being the correct answer.
    - In this interactive setup, you must provide your answer within a specified time frame. Failure to do so results in the question being left unanswered during score evaluation.
    - Upon completion, you can view your scorecard, which is associated with multiple emoticons, each reflecting a different facial expression based on your score.

- ### Password-generator
    - In this project, we leverage HTML, CSS, and JavaScript techniques.
    - We craft passwords by combining a mixture of characters, numbers, and symbols.
    - Furthermore, we offer hints to assess the strength of your password, along with the option to conveniently copy it with a single click.
    - We have also incorporated flexibility in choosing the password length, enhancing the user experience.

ACHIEVEMENTS & CERTIFICATIONS

- I have solved over **500+** problems on **Leetcode.com** and have a contest rating of nearly **1700**+, earned multiple badges and consistently ranked in the top 11 percent on Leetcode.
- **300+** problems on **coding ninjas platform** and **250+** problems solved on multiple platforms like **GFG**.
- Participate in "**HackOn With Amazon – Season 3**" Hackathon and strive to achieve a position in the top 7000 out of 48,000 participants.
- I have a Responsive Web Design Certificate from **freeCodeCamp.com**, along with 5 responsive projects [Link]

Ss KILLS

- **Programming Language**: C++, JavaScript
- **Web Technology/Library/Tools**: Figma, HTML, CSS, JavaScript, Typescript, Next.js, Canvas, Bootstrap, Mongo-Db, Express.js, Tailwind-CSS, Git, GitHub, jQuery, React.js.
- **CS Fundamental**: Object-Oriented Programming, Computer Network, Operating System, Database Management System, SQL (achieved **SQL badge** on Leetcode.com).
- **Soft Skills**: Typing, Adaptability, Leadership, Teamwork, Communication, Sincerity, Discipline.
